

Enrique Roldan

My name is Enrique Roldan. "Dangerous" is my middle name.** Born in Houston Texas. Raised in Mexico until the age of 13. I've played soccer since I was born. I attended Montwood high school in El Paso Texas and graduated in spring of 1995. I am currently studying civil engineering at the University of Texas at El Paso. My

expected graduation is in the spring of 2001. Some of my hobbies include most outdoor sports such as camping and rock climbing. My future goals are to finish my bachelor's degree, probably go for my masters, work for about 10 years and then invest in real estate.

Dan Peiars

At age 18 I moved Terre Haute, Indiana to attend Rose-Hulman Institute of Technology. While at Rose I was a member of the swimming and bicycling teams and active in ASME. This spring I graduated from Rose-Hulman with a degree in Mechanical Engineering. The past two summers I worked for GE Aircraft Engines in a life analysis group and turbine blade service shop. This fall I will attend Virginia Tech to get my masters in Mechanical Engineering. My advisor will be Dr. Inman. In my spare time I enjoy running swimming and biking. Someday I hope to qualify for the Hawaiian Ironman. Right now, I am enjoying the outdoor pleasures that Los Alamos has to offer, as well as the summer school.

Chris Moloney

My name is Chris Moloney. I was born in Boston, Massachusetts. Before college I lived in Pennsylvania and Maryland. My childhood was typical: summers in Rangoon, luge lessons. In the spring, we'd make meat helmets. When I was insolent, I was placed in a burlap bag and beaten with reeds. Pretty standard, really.** I now attend Virginia Tech, where I'll be a senior this fall. Next spring I will graduate with a degree in Mechanical Engineering and a math minor.

My previous jobs include Computer Support Technician and Research Assistant at Bates Physics Lab.

Aside from work and school I enjoy hang out with friends, listening to music and outdoor activities such as soccer, mountain biking, hiking, alligator wrestling, and rock climbing. Right now I am having an excellent time in New Mexico attending the Los Alamos Dynamics summer school and enjoying the surrounding countryside.
