

Miles Buechler

My name is Miles Buechler. I enjoy hunting, fishing, hiking and most other outdoor and wilderness activities. This fall I'll be beginning my senior year in Mechanical Engineering at Montana State University in Bozeman. I am a student researcher in the Composites Group at MSU. I have a wealth of practical experience gained during a 4-year enlistment in the United States Marine Corps. as well as a year I spent as a heavy equipment mechanic at a gold mine in

northern Nevada. I intend to continue my education with a master's degree though I'm undecided what area of research I'd like to pursue.
