

Kenneth Marek

Kenneth Marek is about to begin his fourth year at Texas Tech University. He is studying toward a BS in mechanical engineering major with a Spanish minor. In his spare time, he attends classes, does homework, and sleeps. Occasionally he sacrifices one or more of the above activities to hang out with friends, tinker with things he doesn't really understand, or sleep. Among his other activities, he is a member of ASME and Pi Tau Sigma, and he also enjoys playing violin in the Texas Tech University Symphony Orchestra.

Charles Crane

Charles "Kennan" Crane is a 6th year Senior at Georgia Tech studying Civil Engineering. The first three of his years in college were spent getting an English degree from Emory University. While at Emory, he gained a love of the fine arts and a sizeable amount of student debt in addition to a degree that isn't commercially marketable. In his spare time (insert sarcastic laughter) he spends

time with his lovely wife, Chandra, is active in his church in Atlanta, and is the president of Georgia Tech ASCE. He plans on continuing his already protracted education with a master's degree in Structural Engineering from Georgia Tech.

Amanda Askin

Amanda "Amy" Askin is a senior in Civil Engineering at Rice University in the ridiculously humid town of Houston, Texas. She was born in Iowa City, Iowa, a town made famous by Herky the Hawkeye. While still a youngster, Amy moved with her family to the well heated town of Tucson, Arizona. There she discovered the wonders of Tennis, Salsa (the food, not the dance), and brilliant sunsets. She enjoyed her time in Tucson, but eventually reached a point in her life where she could no

longer resist the call of the polluted waters of the Gulf of Mexico on the coast of the largest contiguous state. At the age of eighteen, she packed up her things and moved to Houston where she, to this day, continues to study textbooks. Those who know Amy well say that she knows of the fine line between brilliance and insanity, and has definitely chosen to stay on the comfortable side of that line.
